Emergency contact information:	
Surgery name (If known)	
Address (if known)	
Next of kin details:	
Name *	
Relationship *	
Contact number *	

The risks involved

Tattoos breach the skin, which means that skin infections and other complications are possible, including:

Allergic reactions. Tattoo dyes — especially red, green, yellow and blue dyes — can cause allergic skin reactions, such as an itchy rash at the tattoo site. This can occur even years after you get the tattoo.

Skin infections. A skin infection is possible after tattooing.

Other skin problems. Sometimes an area of inflammation called a granuloma can form around tattoo ink.

Tattooing also can lead to keloids — raised areas caused by an overgrowth of scar tissue.

Bloodborne diseases. If the equipment used to create your tattoo is contaminated with infected blood, you can contract various bloodborne diseases — including (HIV), (MRSA), (Hepatitis B) and (Hepatitis C).

Medical-related questions

We may need to know more:

The practitioner may have to ask you personal questions related to the information provided below, including medical-related to your personal health. Sometimes we may need to see a note from your doctor before we can complete the tattoo.

Questionnaire

Answer all questions below honestly with a **yes** or **no answer** (tick appropriately)

If you don't answer truthfully and you are deemed to be at a risk at the practitioner's discretion, you could instantly get the appointment cancelled and you could lose your total deposit.
